

Kelly, J. F. & White, W. L. (2026). Enhancing recovery science: From theory to life-stage and context to subpopulations and paradigmatic thinking. *Addiction*, 121(7),1651-1652. doi: 10.1111/add.70500. (Response to commentaries).

Abstract

Incisive and thoughtful commentaries on our proposed recovery research agenda from four internationally renowned addiction recovery researchers suggest several recovery domains requiring deeper analysis as well as adding promising additions that expand the agenda. These help stimulate further debate and enquiry that ultimately could help clarify and enhance recovery science knowledge.
